EXPERIENCE

Full Stack Developer Intern

May 2025 – July 2025

CollegeTips.in

Bhopal, Madhya Pradesh

- Built and deployed a full-stack AI-powered multilingual chatbot covering 25+ digital literacy intents (WhatsApp, UPI, etc.) with Hindi and English support.
- Achieved approx. 90% intent-matching accuracy during controlled testing using structured NLP prompts.
- Optimized backend request handling to deliver chatbot responses in under 1.2 seconds on average.
- Live: dlc-chat-bot-frontend.vercel.app

PROJECTS

Document Fraud Detection Using AI | *React, TypeScript, Python, FastAPI, CNN* | [GitHub](#)

April 2026

- Built a hybrid AI pipeline combining ResNet18 (CNN) with classical forensics — ELA, Canny Edge, ORB Clone Detection, Metadata Analysis, and OCR — achieving 72% validation accuracy on 24,000+ images (CASIA 2.0, CG-1050, COMOFOD).
- Integrated Grad-CAM on ResNet18's final conv layer to produce interpretable heatmaps highlighting tampered document regions, making predictions explainable.
- Designed a weighted hybrid scoring engine (45% image · 30% metadata · 25% text) with confidence calibration, outputting Low/Suspicious/High Risk decisions; deployed on Vercel + Render with automated PDF report generation.

Schedulr – Calendly Clone | *React, Node.js, Express, Prisma, PostgreSQL* | [GitHub](#)

Feb 2026

- Built a full-stack scheduling platform replicating Calendly's core UX — event type management, availability configuration, and public booking pages with double-booking prevention.
- Implemented a custom slot generation algorithm handling timezone-aware availability, duration-based time slicing, and conflict filtering against confirmed bookings.
- Deployed frontend on Vercel and backend on Render/Railway with PostgreSQL; includes seed data, Prisma migrations, and a complete REST API across 9+ endpoints.

Full Stack Media Gallery Platform | *HTML5, CSS, JS, Node.js, Express, MongoDB* | [Live](#)

May 2025

- Deployed a full-stack gallery app with JWT authentication, Cloudinary media hosting (4-5s upload for files up to 10MB), and a secure email password-reset workflow via Nodemailer.
- Designed scalable MongoDB backend supporting 100+ images/videos per user with structured metadata storage and server-side route protection.

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, HTML5, CSS3

Frontend: React.js, TypeScript, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, JWT Authentication

Database: MongoDB, PostgreSQL, Prisma

Tools: Git, GitHub, Postman, VS Code, Vercel, Render

EDUCATION

Jaypee University of Engineering and Technology

Guna, MP

B.Tech in Computer Science Engineering; CGPA: 6.7/10

Aug 2023 – May 2027

CERTIFICATIONS & ACHIEVEMENTS

ISRO – Certificate of Merit, Space Science & Technology Awareness Training (START)

Deloitte – Data Analytics & Forensic Technology Job Simulation

Coursera – Supervised Machine Learning: Regression & Classification (Andrew Ng)
